KIM CAMERON'S SEAPER POWER SERIES!

SEPTEMBER 23, 2012

**IN SEARCH OF BLEU JAY'S TREASURE** is the first of the SEAPER POWERS adventure series and features a young girl named Emma. She's adventurous and loves the ocean and often visits the Caribbean with her family.

On a family vacation to St. Thomas, she strangely encounters two sea creatures—an octopus named Oliver and his new friend Steve the starfish. Oliver and Steve are both shy and have problems making friends and like Emma, love to explore the ocean.

While searching for her lost necklace in the ocean, Emma discovers that the mystical powers of the water makes her speak to the underwater creatures. Later she learns that the waters are enchanted with natural healing agents found in the sea grass and there might also be a buried pirate treasure. She then embarks on an adventure with her new friends, Oliver and Steve, in search of Bleu Jay's treasure, named after the pirate who buried it.

**IN SEARCH OF BLEU JAY'S TREASURE** is magical and mystical and full of wonderful adventures. It's a great way to teach children about the ocean and some of the creatures that dwell there and most

importantly—about friendship, acceptance and bravery. Children should always be reassured that they are never alone because their differences make them special.

The wonderful illustrations by Rebekah Philips and Jason Albert, takes you on the journey with Emma and her friends through the waves of the pages.

**THE MYSTERY OF THE BLUE PEARLS** is the second of the SEAPER POWER adventure series. Emma is all grown up and has been invited back to St. Thomas by The National Oceanic and Atmospheric Administration to investigate the unusual colors of pearls in the ocean. The scientists at the NOAA observed that the pearls were a turquoise blue color and expressed concerns that pollution might be the cause.

Emma quickly reunites with her friends Oliver and Steve and they set out to investigate the mystery of the blue pearls. During the rigorous and suspenseful journey, they encounter many new friends. Obelia the oyster and a Nemo named Marty whose life she has to save after he saves her from danger.

Emma and her crew need to travel to Marty's home called Reflecta. Reflecta is a magical place with healing powers and it's the only place that can save him. Reflecta is guarded by a giant Obelidian boulder that mirrors its surroundings and remains hidden from humans. With the help of Wally the whale they journey to Reflecta however, Emma still has to convince her new trusted friends that she is trustworthy enough to enter Reflecta and ultimately save Marty's life while trying to escape evil pirates. In the book Kim Cameron's description of Reflecta is simply MAGICAL.

The second series did not disappoint. The suspense and thrill of the adventure will have children completely engaged. Searching for the mystery of the blue pearls reinforces the bond Emma has with her sea friends. They have all sacrificed a lot to save the ocean and to keep its secrets hidden. After solving the mystery, Emma has earned her place as a true friend and protector of the ocean.

**THE RESCUE** is the third of the SEAPER POWER adventure series and is just as mysterious as the previous two. After solving the mystery of the blue pearls, Emma received a clam from Obelia that allows her to know when her sea friends need help and it won't long after she returned home that the clam began to chime.

Steve the starfish has the Swallow disease and with the help of his friends they have to find a cure to save him. Emma, Marty the Nemo, Oliver the octopus and Wally the whale need to travel to a dangerous and mysterious black hole to find the cure. Upon entering the black hole they found special crystals that can cure Steve's disease, however, something mysterious happens and shocks everyone.

The pure, untouched waters of the black hole has changed Emma and Marty back to children. After they leave the black hole with the cure, they save Steve and the other animals afflicted but as children again. Emma and Marty encounter many risks, like having to sneak into the lab where children weren't allowed.

Though **THE RESCUE** is full of thrilling adventure, it portrays the love and dedication Emma and her friends have for each other. Emma and Marty being children again is totally adorable and apart from exploring St. Thomas, children get to join the journey to St. Kitts as well and now have to travel to the Florida Keys to find a cure that will return them to adults.

The fourth book of the SEAPER POWER Adventure series is **THE RIDDLE**. In the video Emma and Marty along with Wally, Steve and Oliver travel to the Florida Keys to find a cure that can make them adults again. They have to find a mysterious island with life changing powers.

On their journey they find a cove of Calisto where they met and helped a bunch of cats, in exchange for a piece of meat. They then travel to Guad Island, where they met Captain the captain who led them a mile from the main island before a pirate boat showed up and they were rescued. The scientist to find a cure, had discovered a mysterious sea.

The map holds the key to finding the cure and Emma already knew something strange about her past and about finding a mysterious island in Florida. The adventure will continue and going to explore islands. There is always something new on every island that will take like readers looking.

Video

This book is an actual treasure hunt and who doesn't love a treasure hunt. It's full of wonder and mystery and you, **REVELS**. In all of Kim Cameron's books, children can learn as much about life in the ocean and the Caribbean. Given the fact that the illustrations and messages in these books are very important to both children and adults.

Though these books are for school aged readers, younger children will also enjoy reading about Emma and her friends and guarantee you will visit the Caribbean and getting to explore islands.
